What Makes a Teich School Garden System Better?

- **Get higher productivity per square foot compared to a traditional in-ground garden**
 - Teich Garden Systems use raised beds
 - There is less soil compression in a raised bed which allows for better soil aeration – plant roots need air
 - Plants can be spaced closer together
 - Allows you to plant earlier in the season and keep gardening later in the season
 - Teich Garden Systems use high quality soil
 - You are able to apply fertilizer and compost more carefully since they only need to be applied to the garden beds
 - Grow healthy vegetables and flowers even if the native soil in your location is not suitable for planting
- **TGS provide deer and critter protection allowing you to enjoy your garden's bounty**
 - Teich Garden Systems are surrounded by vinyl-coated heavy gauge galvanized metal fencing and are effective at keeping deer and many other critters out. Feed your school rather than feeding the local deer and woodchuck population.
- **Minimize the effort required to maintain your garden**
 - Teich Garden Systems include an embedded watering system as well as a weed barrier to reduce the ongoing maintenance of your garden
- **Gardens can be installed in almost any location**
 - Teich Garden Systems can be placed in almost any location that receives at least 6 hours of sunshine a day - even on a hillside. If you thought you didn't have a spot for a garden, look at a Teich Garden - it is the perfect solution.
- **Teich Garden Systems are customized according to your individual needs**
 - Pick the perfect size, bed layout, wood and stain.
 - Rolling planting beds and paved areas are among the many features that you may select to make your school garden ADA compliant.
- **You can rest assured knowing that the project will be done right**
 - Teich Garden Systems has installed hundreds of garden systems nationwide.
 - Teich Garden Systems are built using wood joinery techniques, craftsmanship and attention to detail similar to those used in home building.
 - TGS uses hand-picked woods, brass faucets and other high quality materials to produce an outdoor classroom that will enrich your curriculum while minimizing the work required by teachers and students who can spend their time teaching and learning rather than weeding and watering.
- **Teich Garden Systems include a two-year warranty**

Robert Bell Middle School, Chappaqua, NY (12x90)

Sleepy Hollow High School, Tarrytown, NY (12x24)

Just Add Sun™

TGS custom designs and installs animal-resistant , sustainable garden systems for gardeners of all ages.

The gardens require very little maintenance enabling teachers and students to focus on teaching and learning rather than weeding and watering.

Teich Garden Systems are effective at keeping deer and critters out. Poor native soil is never a problem because we use 100% healthy soil. Gardens can even be installed on uneven landscape or slopes.
